 <p>The diagram illustrates the assembly of the table legs. It shows a side view of the table base with four legs. Two circular callouts provide a magnified view of the leg attachment mechanism. In these callouts, the components are labeled: 'A' is the screw, 'B' is the washer, 'C' is the second washer, and 'D' is the L-shaped bracket. The assembly process involves inserting the L-shaped bracket into the leg and the table base, then passing the screw through the bracket, the first washer, the second washer, and finally into the table base.</p>		 <p>The diagram shows the final assembled table, which is a round, two-tiered table with four legs. The top tier is a flat circular surface, and the bottom tier is a smaller circular surface. The legs are attached to both tiers, providing a stable base for the table.</p>
